UKS/M Objective

School Health Program (Usaha Kesehatan Sekolah/Madrasah-UKS/M) aims to enable the school community to live a healthy life, to improve the health status of students as well as to create a healthy environment so that the students can reach their optimum potential

UKS/M target

School community, UKS/M Team in each implementation level, community and stakeholders at large

Current Government Programs for Nutrition Intervention/Promotion

My Health Report Card

Consist of 2 series: Health information and Health Report.
The nutrition topics covered in the book are breakfast, school canteen, nutritional status, healthy and hygienic life style, physical activity.

Weekly Iron and Folic Acid Supplementation (WIFAS)

IFA supplement is distributed by the community health center to schools/madrasas. The IFA supplement is given once a week to school-going adolescent girls at junior and senior high school level. The school or the local government designate a specific day in a week for the gifts to consume the supplement together at school/madrasas.

Healthy School Model

1. Utilization of the literacy time for reading health topic.
2. Regular health screening and checking.
3. Enjoy breakfast and snacks together at school.
4. Distribution of Iron and Folic Acid supplement.

School Children Nutrition Program – Program Gizi Anak Sekolah (ProGAS)

Program focus is the three interrelated components namely:
1. Increasing the nutritional intake through provision of healthy breakfast in accordance to balanced diet guideline utilizing local recipes and food source.
The program target is elementary school students in food insecure areas, stunting focus or specific areas (post disaster area, country borders and remote areas).
